3. Fill in the following Venn diagram to show the differences between terrestrial and aquatic.

4. Using the space below to organize your thoughts, draw a concept map on the back of this page that shows the relationship between the following words and, at the same time, defines the words. Use the word "ECOLOGY" as the central concept. Provide detailed notes on the lines between the concepts to show relationships and definition.

- a. Adaptation
- b. Physiological
- c. Structural
- d. Behavioral
- e. Niche
- f. Habitat
- g. Ecosystem
- h. Biome
- i. Biosphere
- j. Terrestrial
- k. Aquatic
- l. Clim(at)ograph
- m. Keystone Species
- n. Abiotic Factor
- o. Biotic Factor
